TEOS MARINA E-GAZETE

We Met with Özkan Gülkaynak in Garden of Eden

ZES electric vehicle charge supply is now in Teos Marina

Military exercise for the protection of the sea area

The biggest catch in 'TMT' is 81.5 kg

The biggest fish caught in the Tuna Masters Teos 2020 final was by the Tornado team, which competed with Mahmut Özgener's boat. To receive the award, Tornado team took the stage with Can Özgener, the youngest member of the team and the son of Mahmut Özgener.

The teams that registered for the fish tournament tried to catch the biggest fish with their fishing rods by struggling with the harsh conditions on the sea with 55 boats. Nihat Altinkaya and Alp Kırşan, beloved faces of the screens, also attended Tuna Masters Teos this year.

Special jury award goes to 4-year-old Can Ayaz

The name that marked the Tuna Masters Teos fish tournament was Can Ayaz Özer, 4, who participated in the tournament on the boat named Cano 1 with his father. As the youngest participant of the tournament, he received the Jury Special Award from Elvio Pennetti with his father Can Özer on the stage.

The Tornado team won the "The biggest fish" award of Tuna Masters Teos. Baracuda team, which caught two fish of 73.9 and 53.7 kilograms, won the first prize.

The Lifeboat team won the second prize with two fish of 62.2 and 52.7 kilograms; returning to the field with two fish weighing 58.1 and 55.7 kilograms, the Shamu team won the third prize.

Tuna Masters Teos, which the contestants call the "League of Giants", was closed to visitors due to the pandemic this year, but despite being held without an audience, it will never be forgotten.

Considering the fish caught in Alaçatı and the collected points in total, SHAMU, the "Tuna Masters of the Year" team of the year, will carry the championship belt for 1 year and will give it to the new championship a year later.

Rebirth of sailboat KAYITSIZ III

Özkan Gülkaynak's sailing boat Kayitsiz III, known for his solo tour around the world; has been renewed in a way that will not wear out in the harsh conditions of nature and it will always live.

The new deck, made of Burmese teak wood, was renewed by creating fiber barriers in a way that will not transmit moisture and rot to the lower parts. Elements such as the cane (civadra) aft platform on the deck were reconstructed. New equipment such as capstan made from special bronze alloys were added.

A brand new sail mast was manufactured with the woods that were laminated and combined with very special methods and the bronze equipment on it. It has been made to cruise even in the toughest runs by preserving its artistic appearance.

Özkan Gülkaynak has a deep bond with KAYITSIZ III, who has many memories with it. It looks like he will continue his marine life modestly.

Due to family ties, he is not planning a cruise to distant seas for now. But he plans to visit Norwegian fjords and even the Arctic at the first occasion.

Özkan Gülkaynak, who launched his boat to the sea at Teos Marina, told the residents of Teos Marina about his journey to the west of the freedom line with his sailing boat KAYITSIZ III. A special screening for the residents of Teos Marina was held at the Garden of Eden in the open air with social distance.

The documentary was enriched with Gülkaynak's narrations.

Erke Marine introduced its electric motor

Teos Marina keeps contributing to a greener world. In order to leave environment-friendly footprints on nature, we should prefer sustainable energy products. So, at the event where Erke Marine company introduced electric outboard motors, Teos Marina residents had the opportunity to examine the product closely and took a test drive.

Another innovation in Teos Marina!

With the cooperation of Zorlu Energy Solutions, the fast charging station for electric vehicles started serving in Teos Marina.

Teos Marina, prepared for both today's and future's technologies with clean and renewable energy, cooperated with Zorlu Energy Solutions (ZES) brand by Zorlu Energy and established an electric car charge supply station within the marina area.

Continuing to open charging stations in our country in order to contribute to the widespread use of electric

cars, ZES provides service with its stations in approximately 350 locations and 600 sockets in 81 cities with its latest investments. You can follow the current location, socket number and fee information on the website <https://zes.net/>.

Contribution to regional tourism

While many sectors were affected by the pandemic, Teos Marina made use of it with infrastructure and improvement works.

Teos Marina started providing a 300 mbps free Wi-Fi service to its residents this summer by strengthening its fiber infrastructure along with new comfort

areas such as the Garden of Eden and Sunbathing Platform, and it has made another innovation with the ZES electric vehicle charging station before 2020 is over.

Being the only one between Izmir city center and Urla, Torbalı and Kuşadası, The ZES charging station in Teos Marina also provides the drivers with the opportunity to explore Seferihisar, Sığacık and Teos Marina Bazaar. Visitors can meet their needs such as food & beverage and shopping during their journey to get to know the historical and natural beauties of the region while charging their vehicles. In the Izmir region, besides Teos Marina, there are public ZES stations in Narlıdere, Gaziemir and Selçuk.

Emergency drills are held regularly

Emergency drills continue at Teos Marina. In order to prevent the danger and marine pollution, Meke Marine Technology Inc. Carried out an exercise by using special equipment. Against the risk of pollution of the sea by oil and other harmful substances, the barrier wrapped around the barrel was laid out to the sea by racing over time. Vacuum scraper pump was started for the sea surface. The exercise scenario was successfully completed by setting up a storage pool.

TEOS MARİNA

HUZUR VE GÜVENİN ADRESİ

İster denizde, İster karada

%40
İndirimli
kışlama fırsatı

1 Ekim - 30 Nisan tarihleri arasında, en az 90 günlük sözleşmeler için geçerlidir.
